PRODUCT DIMENSIONS

INTENDED USE

INTER-TACT-B is a touch switch that can be easily integrated into cabinets and furniture. In addition to turning on and off the compatible fixtures connected to it, it also allows you to adjust brightness to the desired level by holding your finger on it.

WARNING

1. Install this product in accordance with the applicable electrical code. This product is designed for installation by a qualified person or electrician.
2. This product is designed to operate with a 12 VDC or 24VDC Class 2 transformer. Never connect directly to a high-voltage source.
3. This product is designed for indoor use and is not protected from moisture.
4. This product must be connected using the connectors built into the product.

WARRANTY

This product is warranted against manufacturing defects for a period of two (2) years from the date of purchase and does not include the other products shown on this sheet, if any. For a complete description of the warranty, visit www.innovadel.com or contact our technical support. Any modification, alteration, improper installation of the product, or cutting of connectors, will void the warranty.
